

Collection 2024  
**VICRILA**

Where  
excellence  
meets  
transparency.

### **Creating emotions in every detail**

In the moments that make the difference, glass comes to life. From the most joyous celebrations to intimate family gatherings, every moment is special.

At our factory, more than producing quality glass, we are weaving your most precious memories. We strive daily to be a part of your experiences and share with you the magic of every occasion.

### **Our history behind every glass**

At VICRILA we have been manufacturing table glass since 1890. Our experience and quality make us a benchmark in the hospitality sector.

Our mission is to accompany our customers by providing them with the best solutions in table glassware, adapting to their real needs and offering the best service to boost their business together with them.

### Sheer Rim

A technical treatment that brings comfort and sophistication to the finish of each glass. This clean cut not only enhances aesthetics, but also intensifies your senses, elevating your moments to new emotional heights.

### Fully Tempered

Our TEMPERED products guarantee unrivalled mechanical and thermal resistance. VICRILA glassware is completely tempered from the mouth to the foot, offering exceptional resistance to intense impacts. Less breakage, more durability and savings on replacement costs.

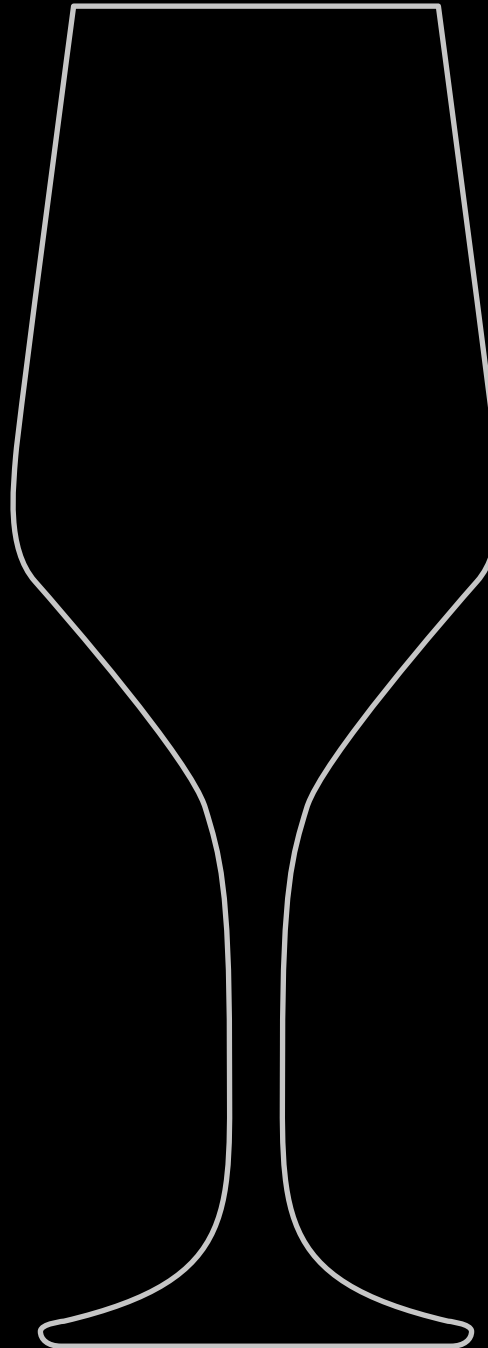

### Lightness

We design items that are slimmer and 15% lighter in all our ranges, while maintaining unparalleled strength. Lightweight not only adds elegance, but also facilitates a more agile and attractive service.

# Attributes that are accomplices of your most special moments.

In every curve and detail of our glassware, you will find the key to experiences full of emotion, where design becomes an accomplice of your most special moments.

### Stackability

Optimise your space with our stackable products, which save up to 60%. In addition to gaining amplitude, stackability streamlines the handling of items, all designed with hardened resistance to face professional use.

### Visual increase in capacity

Our items are not only visually appealing, but also visually increase the amount of liquid contained in the item.

This design attribute allows for greater performance in beverage service.

### Filling level indicator

The change of shape in the profile of the article serves as a filling indicator for proper capacity. On the other hand, by pouring the correct amount of liquid, we leave the necessary space in the container for the aromatic components of the beverages to be activated, providing a better customer experience.

### Maximum oxygenation

Experience excellence in tasting with items designed to maximise oxygenation. The shape of our products elevates the perception of smells and flavours with every sip.

### Large surface to decorate

Personalise your items with the peace of mind that comes from having a large space to decorate.

Your message, brand or design will have the visibility it deserves by having a large surface to work on.

### Perfect Height

Items with this attribute are perfect for making the most of the space inside the dishwasher, without running the risk of breakage due to incorrect placement. Ideal to accommodate standard size wash baskets.

## **T** Tempered

Our articles are the MOST RESISTANT on the market.

- + Resistance
- + Safety
- + Durability
- Replacements
- Breaks

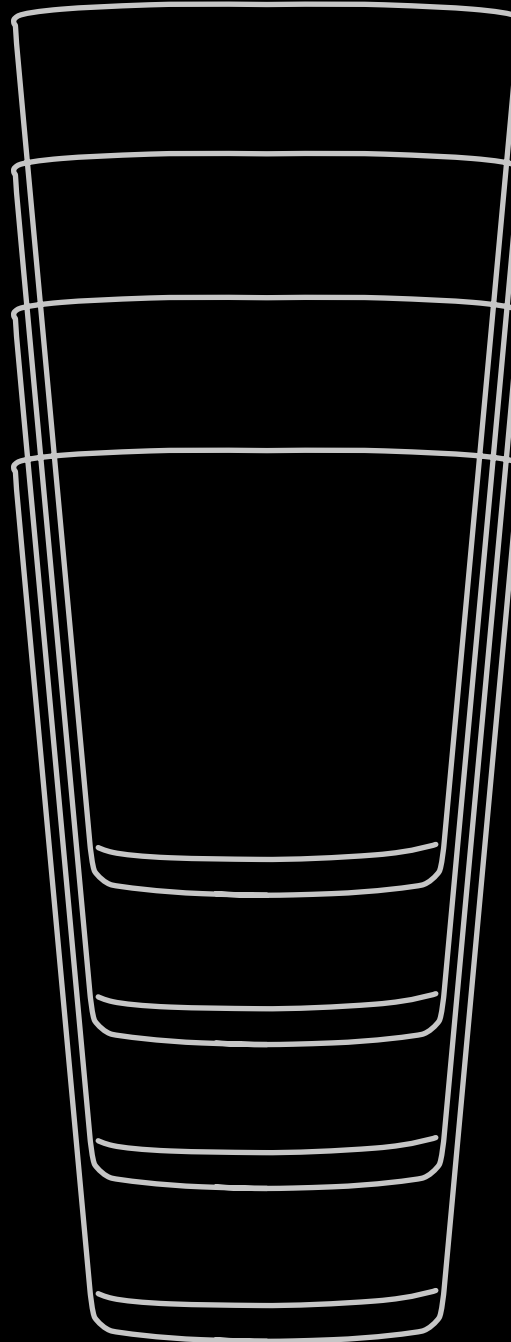

## Lightness

We make LIGHTER and MORE STYLISED products.

- + Easy to handle
- + 15% lightness
- + Stylised

## What makes us unique.

Our products are not like others. We strive to manufacture the best glass on the market, with the best technical features and the most efficient design, so that you only have to worry about enjoying yourself.

## Stackable **S**

Our STACKABLE products are the SAFEST and MOST EFFICIENT on the market.

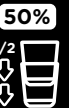

- + Space saving
- + Easy to collect and handle
- + Tableware hygiene
- + Safety

## Our Stackables:

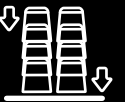

ALWAYS tempered

They have a MINIMUM of 50% of stacking

STORAGE:  
At least 4 units must be stackable.

HANDLING:  
At least 8 units must be stackable.

## Glass care & Handling

 <p>Do not stack tumblers and glasses that they do not have the capacity to stackability.</p>	 <p>Do not use glassware for storage of flatware</p>	 <p>Separate glassware, flatware and plates in bus trays.</p>
 <p>Never pick up glasses in bouquets.</p>	 <p>Never pour cold liquid into a hot glass, such as one just out of the dishwasher, or hot liquid into cold glass.</p>	 <p>Never scoop ice with a glass. Use a plastic scoop.</p>
 <p>Empty ice from glass before sorting bus tray, this allows more time for the glass to reach room temperature before washing.</p>	 <p>Utilize the correct rack system for tumblers and stems. A divided rack is always recommended.</p>	 <p>Thermal shock: The result of a rapid temperature change in the glassware which can crack the stem. Only in non-tempered stem.</p>

Where  
excellence  
meets  
transparency.
